Your book "Post-Mortem" is very interesting regarding the NAA, Spect. analysis as well as autopsy report namely the comparaisar between the written version and the typed version.

I have sent a letter to Arlen Specter to have some explanations. I have still received no answer. I expect a reply like: "Read the Warren Report!" I asked him who permitted to change the expression "puncture wound" for "much smaller wound". I wonder how that fraud got away with it so easily.

Bye.
